Education

University of Ottawa Ottawa, ON
Bachelor of Applied Science in Mechanical Engineering, Honours CO-OP – Cum Laude *Sept. 2016 – Dec. 2021*

Experience

Project Manager Sept. 2025 – Present
Department of National Defence – MSC8 Division *Gatineau, QC*
- Accomplishment 1: start with an action verb, say what you did and the measurable result – this line is sized to wrap onto a second line
- Accomplishment 2: scope, scale or responsibility (e.g., number of work packages, budget, team size)
- Accomplishment 3: a tool, process or improvement you introduced and its impact on schedule, cost or quality

Senior/Lead Mechanical Engineer Jan. 2022 – Aug. 2025
Department of National Defence – MSC8 Division *Gatineau, QC*
- Accomplishment 1: start with an action verb, say what you did and the measurable result – this line is sized to wrap onto a second line
- Accomplishment 2: scope, scale or responsibility (e.g., number of work packages, budget, team size)
- Accomplishment 3: a tool, process or improvement you introduced and its impact on schedule, cost or quality

FSWEP Engineering Intern May 2021 – Dec. 2021
Department of National Defence – MSC8 Division *Gatineau, QC*
- Verified Cost Estimation Models outputs and performed updates to the model network to improve accuracy for long-range forecasting activities
- Produced an Interference Item map of a Halifax-Class frigate outlining the surveys and structural work that needed to be completed on a specific ship, prior to the commencement of a Docking Work-Period (DWP)

Junior Mechanical Engineering Intern (Co-op) May 2020 – Aug. 2020
Department of National Defence – MSC8 Division *Gatineau, QC*
- Integrated formative changes to a Material 650 Database that defined the overall maintenance scope of mechanical components for each PMRS (using an Excel trend analysis structure)
- Extracted information from RDIMS to incorporate changes within numerous baseline SSMRS's, including the creation of Bid Statements for each specification item

Process Engineering Intern (Co-op) Sept. 2019 – Dec. 2019
Canada Post – Letter Mail Division *Ottawa, ON*
- Prototyped and deployed an automated tool to test a new sortation device under a production load at a processing plant
- Created a User Quick Start Guide in the development of a CAMS system that defines the hardware configuration and internal system functionalities for a newly developed sortation mechanism
- Researched the effects of declining letter-mail volume throughout the years from a MLOCR sortation device
- Developed and simulated testing trials to measure the volume distribution of letter-mail from a newly coded PDX (Plant Data Exchange Tool)

Junior Mechanical Engineering Intern (Co-op) Jan. 2019 – Apr. 2019
Department of National Defence – MSC8 Division *Gatineau, QC*
- Particularized and defined the scope of an HMCS (Her Majesty's Canadian Ship) Work Package to outline military work with high importance
- Updated past-produced Engineering Changes (EC's) while analyzing maintenance work at the West Coast Dockyard
- Drafted contractual documents that included Standard Ship Maintenance Repair Specifications (SSMRS's), Alert Letter(s), Project Milestone Events List (PMEL's) and Performance Work Statements (PWS)

Junior Mechanical Engineering Intern (Co-op) May 2018 – Aug. 2018
Department of National Defence – MSC8 Division *Gatineau, QC*
- Modeled (3D – SolidWorks) the formation of piping for Non-Destructive Tests (NDT) to illustrate possible heavy-levels of corrosion in the interior area of the pipes
- Conducted research on the exterior portion of a ship's Bulbous Bow system, to analyze the change in frequency of wave patterns
- Generated databases within DRMIS, for the maintenance repairs and overhauls of specific mechanical components

Technical Skills

Business & Project Tools: MS Project, Primavera P6, Advanced Excel, Power BI, SAP, DRMIS, Cursor, Slack, Notion
Languages: Python (Basic), Typescript (Basic), Javascript (Basic), C++ (Basic), MATLAB
Technologies: SolidWorks, Computational Fluid Dynamics (CFD), Finite Element Analysis (FEA), Multisim, LabVIEW, SkyCiv
Projects: Drone Responder Design, Self-Leveling Glider, Truss Bridge Design, Gift-Wrapping Apparatus
Interests: Aerospace/Naval Design, Corporate Strategy, Structural Analysis, 3D Modeling, Lean Manufacturing, FP&A
